

## **Reviewing procedure of contributed papers**

Each contributed paper will be sent to at least two independent reviewers. At least one of the reviewers will be affiliated to a foreign institution other than the nationality of the author. Double-blind review process will be used (i.e. the model in which the author(s) and reviewers do not know their identity). If the above is not possible, the reviewer must sign a declaration that conflict of interest doesn't occur. The conflict of interests, between the reviewer and the author(s) shall be considered when there exist:

- direct personal relations (kinship, the legal relationship, conflict),
- professional subordination,
- direct scientific cooperation in the past two years prior to the preparation of a review.

The review should have a written form and should be concluded with clear statement regarding either the acceptance or the rejection of the paper.
